

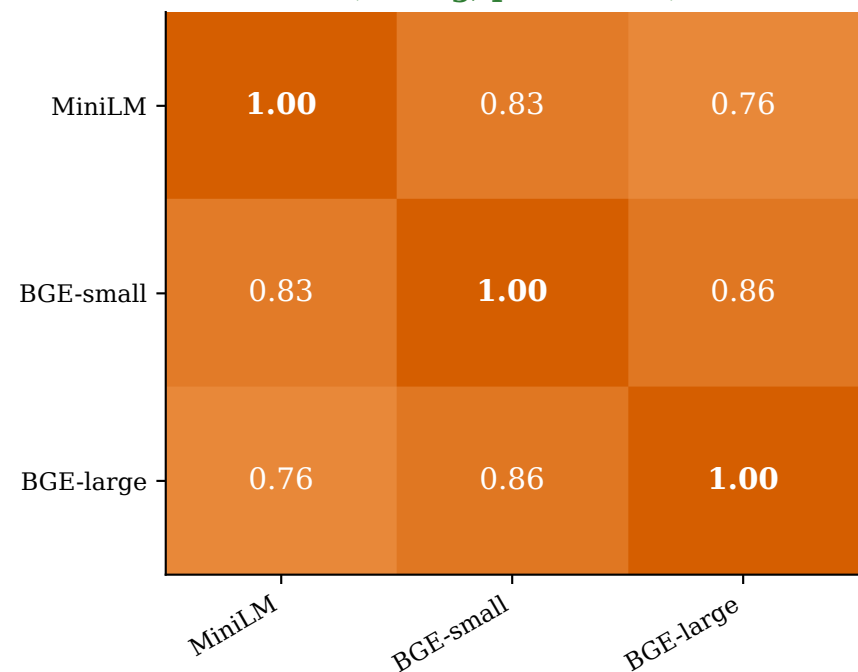

Figure 4 · Cross-model stability · pairwise Spearman ρ (3 sentence-transformers)
Strong cross – model ranking agreement within paradigm

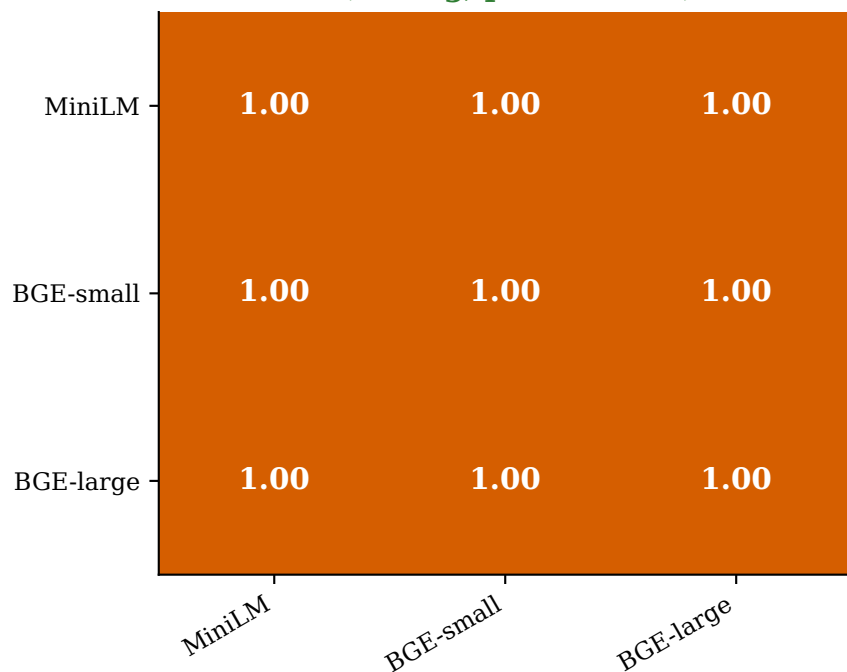

(a) $\bar{s}_{con}$ (concentration)

W = 0.878 (Strong, p = 0.0101)

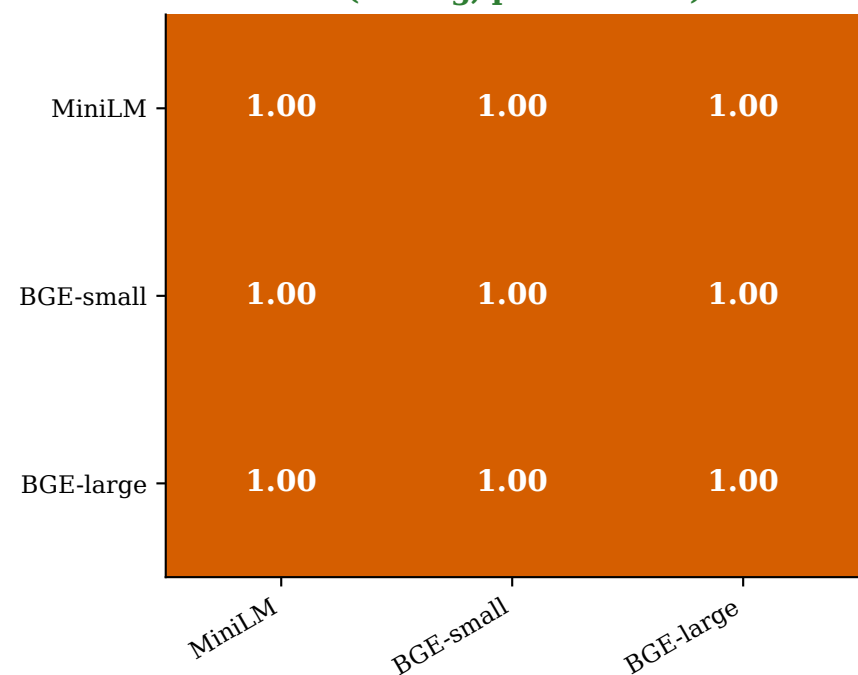

(b) $\bar{s}_{num}$ (unique fraction)

W = 0.976 (Strong, p = 0.00459)

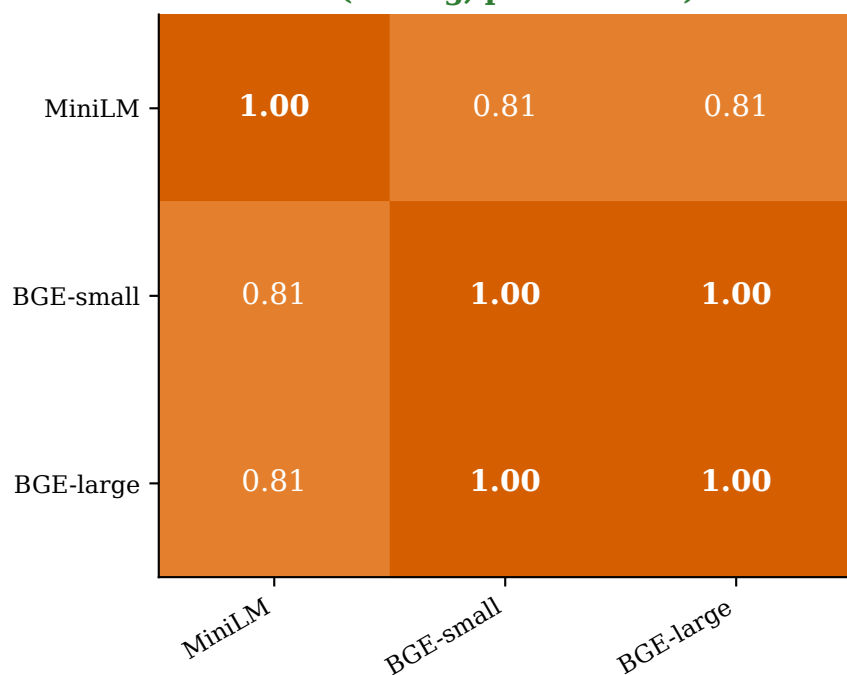

(c) $\bar{s}_{rep}$ (repetition)

W = 0.976 (Strong, p = 0.00459)

(d) $\bar{s}_{div}$ (Vendi diversity)

W = 0.915 (Strong, p = 0.00752)

Spearman ρ

All pairs $\rho \geq 0.76$ on $\bar{s}_{con}/\bar{s}_{div}$; $\bar{s}_{num}/\bar{s}_{rep}$ are theoretically identical (MinHash).
