

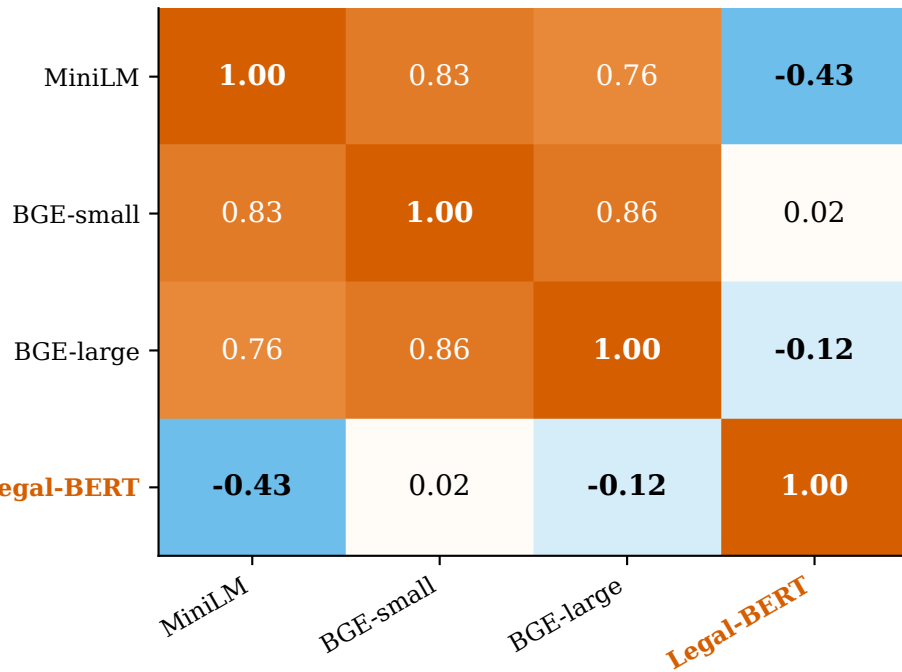

Figure 4 · Cross-model stability · Kendall's W + pairwise Spearman ρ
Legal – BERT breaks cross – model consensus on $\bar{s}_{con}$

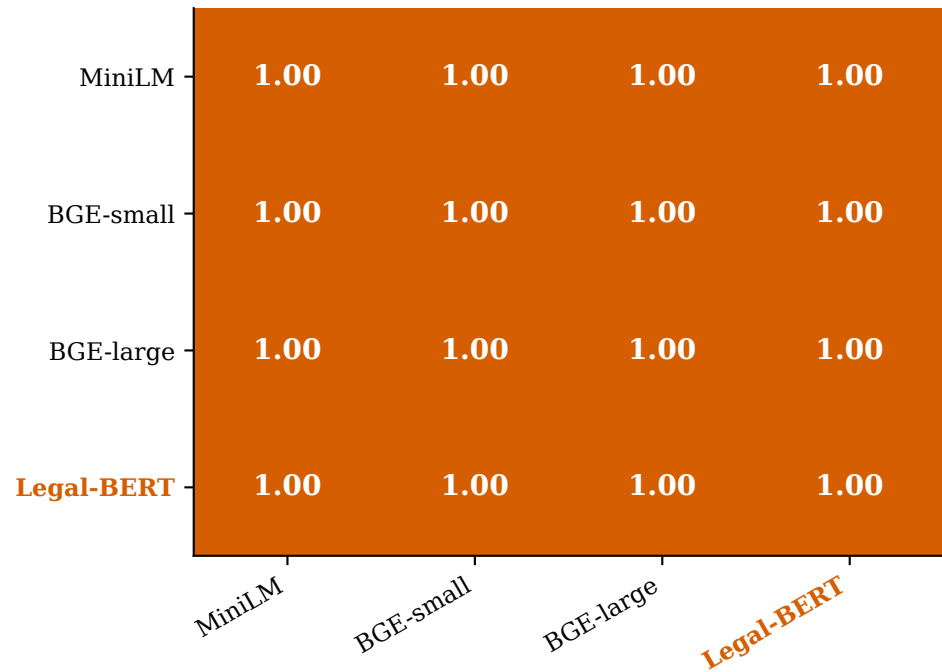

(a) $\bar{s}_{con}$ (concentration)

W = 0.491 (Weak, p = 0.056)

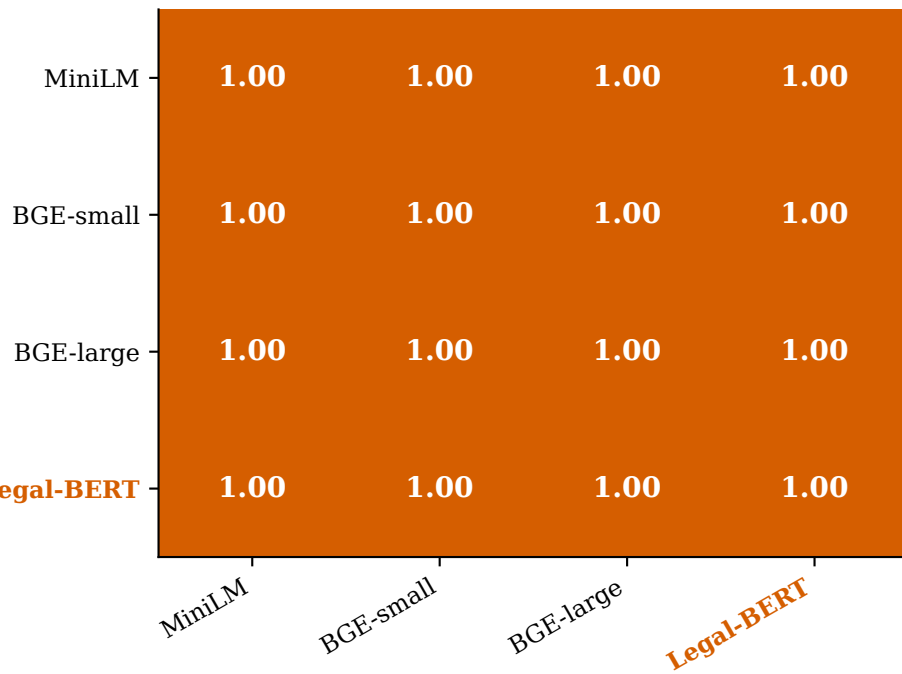

(b) $\bar{s}_{num}$ (unique fraction)

W = 0.976 (Strong, p = 0.000)

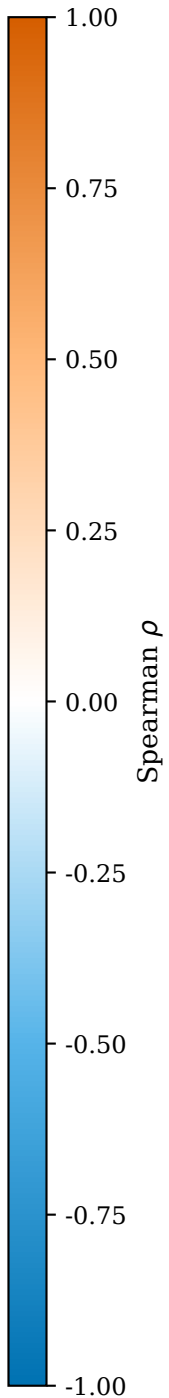

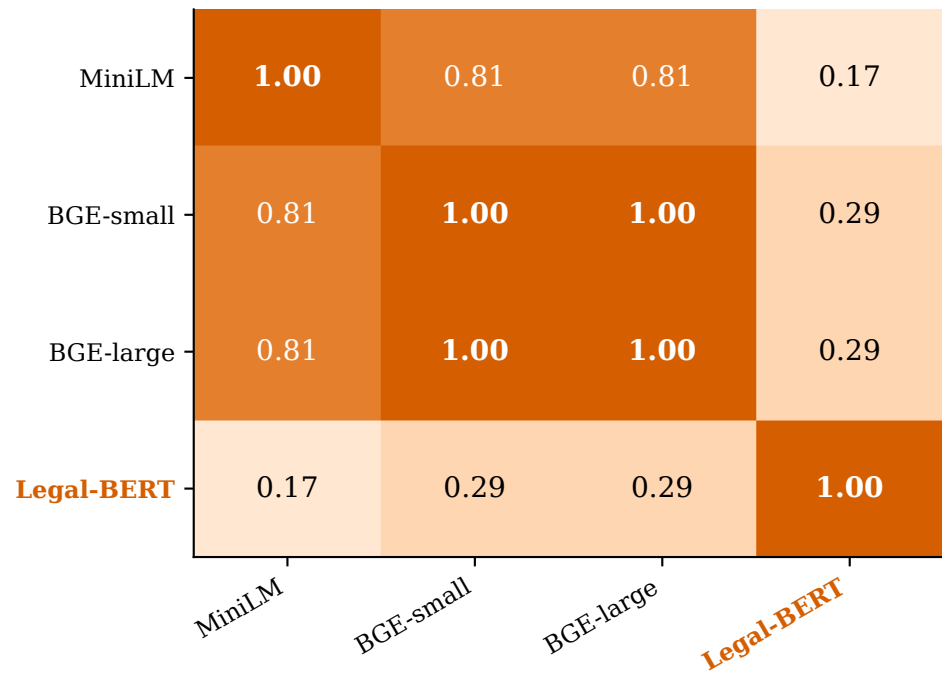

(c) $\bar{s}_{rep}$ (repetition)

W = 0.976 (Strong, p = 0.000)

(d) $\bar{s}_{div}$ (Vendi diversity)

W = 0.670 (Moderate, p = 0.009)

Legal-BERT ticks shown in red. $\bar{s}_{con}$: $\rho = -0.43$ with MiniLM, indicating opposite subcategory rankings.
